Windows 7 and Windows Server 2008 R2 Timelines Shared at Computex

Steve Guggenheimer's anniversary keynote address at leading OEM conference highlights partner opportunities with upcoming Microsoft innovations.

TAIPEI, Taiwan – June 3, 2009 – Today during a keynote address at Computex 2009 in Taipei, Microsoft's OEM Division Corporate Vice President Steve Guggenheimer revealed that the company is confident with the progress made with Windows 7 and Windows Server 2008 R2, and that as a result, Microsoft will deliver Release to Manufacturing (RTM) code to partners in the second half of July. **Windows 7 will become generally available on Oct. 22, 2009, and Windows Server 2008 R2 will be broadly available at the same time.**
