

Incompatible software

Some of the software on your computer is incompatible with this version of Mac OS X. Because this software may cause problems with your computer, it has been moved. You can delete incompatible software that was moved.

Incompatible software on your computer was moved to a folder named "Incompatible Software" on your startup disk:

McAfee VirusScan: version 8.6 is not compatible with this version of Mac OS X.

For more information about incompatible software, see this Apple Support article: <http://support.apple.com/kb/HT3258>.
